

Organize competitions clearly

Windows software for your club

PLAN

Bring competitions, participants and starts together

RECORD

Check results and prepare rankings

OUTPUT

Print, PDF, CSV and certificates

WORK LOCALLY

Manage club data locally; no cloud required

Explore it for 45 days

45 days: W1 + 2 clients = 3 workstations. Then activate via LZM without data loss, with up to 10 clients under licence. Windows W2 and browser workstations share the allowance. Updates retain the full version.

W - competition software for clubs

M - the Android training app for shooters

Developed by a sport shooter for sport shooters

45-day demo; personal full activation through W1. W2 rights come from W1.

AVAILABLE DIRECTLY FROM B-SOFTWARE

Additional workstations in the browser

- 1** W1 remains the complete Windows competition manager, server and workstation 1. The browser provides additional W2 access for shared result entry and rankings. Administration, licensing and final approvals remain on W1.
- 2** Connect both devices to the same local network. On W1 open W-00-00-84 > Browser access. Transfer the public server certificate (.cer), compare its SHA-256 fingerprint with W1 and only then configure trust on the client. Open the displayed HTTPS address. Enter a workstation name and the 16-character W1 workstation code. Do not blindly bypass an unknown certificate warning.
- 3** Use a supported modern browser. Internet Explorer is not supported. An older computer may be suitable if its operating system can still run a compatible browser. The browser device need not run Windows; W1 still requires Windows.
- 4** Choose the competition and participant, enter results and wait for confirmation that they were saved. W1 validates data and calculates scoring centrally. Stop entry when disconnected; resume only after reconnection is confirmed.
- 5** Demo: 45 days with W1 + 2 additional workstations, 3 in total. Full version: +0 to +10 depending on licence, up to 11 in total. Windows W2 and browser workstations share the allowance. Local operation needs neither internet nor a cloud account.
- 6** If connection fails, use “Set up network access” in the W1 browser dialog and confirm the Windows administrator prompt. The network profile must be Private. Access is limited to this program on the local network; keep the firewall enabled.

The activation guide is prominent in demo mode, hidden after valid full activation and shown again automatically if the actual licence state returns to demo. Disconnection or the end of the update period does not start a new trial.

Choose between two intros

W1: Administration > Intro. W1/W2: right-click the colour button > Intro.

There are exactly two choices: “Existing intro (default)” and “New intro with bow”. If no previous choice exists, updating keeps the existing intro unchanged. The new full-screen animation lasts 8.1 seconds: the pistol and rifle from M on the left, bow on the right; three pistol shots, two arrows and one rifle shot. The rifle hit makes the bow fall; the second arrow makes the pistol fall. Sound cannot be muted and the intro cannot be interrupted.

Applies from the next start. The selection is saved for this workstation.

Activate your personal W

Your installation, data and existing rights remain in place.

1

Complete your details on W1

On W1, open Activation / customer details. Complete both columns with person and club details. Choose 0 to 10 additional W2 places and check everything.

W1**2**

Save the request file

Save the .lzmreq request. W adds its installation ID and format BS-LZM-REQUEST-1. You do not need to copy technical identifiers yourself.

.lzmreq**3**

Attach and send it yourself

Open WhatsApp to +49 175 1600 590. Attach the saved .lzmreq yourself and send it. Only then confirm Sent in W. Opening WhatsApp alone sends nothing.

WhatsApp +49 175 1600 590**4**

Open the received licence

Open the received .wliz on W1 or import it in W. W checks its signature, product and installation ID. Check the name and Full version active. No new installation.

.wliz

W2 is activated through W1 only. Import WLIZ files on W1 only. Windows and browser clients inherit its rights and share the purchased client allowance.

45-day demo; personal full activation through W1. W2 rights come from W1.

Your details in two compact columns

Person

First and last name

Street and house number

Postal code and town

Email address

Mobile / WhatsApp

Club and workstations

Club name

Club postal code and town

Club email address

Additional W2 places: 0 to 10

Check carefully before sending

All these details accompany the W1 installation ID in the .lzmreq file. B-Software reviews the request in LZM and supplies your digitally signed .wliz.

WhatsApp: +49 175 1600 590

Save, manually attach, send, then confirm sent in W. The sent status records your confirmation; it is not an automatic delivery receipt.

Email is an optional second route. No activation email address is preset. Use it only after B-Software has supplied and configured the correct recipient. Attach the same request yourself.

Fixed name, editable contact details

The digitally signed full name is fixed after activation. Your address, telephone, email and club details can later be edited in the customer profile. Do not edit the signed licence file. Contact B-Software for a name correction.

Neutral demo and clearly assigned rights

The neutral demo runs for 45 days with no supplied club logos. Import WLIZ on W1 only. W2 has no separate full licence; Windows and browser clients share the 0 to 10 extra places granted by W1.

New in W 2.0.0.0

One complete request instead of separate identifiers

Enter person and club details separately on W1. W saves the structured .lzmreq with its installation ID. You attach it to WhatsApp yourself and confirm sent only after sending it. No activation email address is preset.

A personal full version with clear identity

The .wliz contains the signed full name, device identity and product rights. The name is fixed; address, telephone, email and club details remain editable in the customer profile. W2 is still licensed through W1. The neutral 45-day demo also serves as the update package.
